Welcome to Able AI

Our mission is to make AI accessible and beneficial for **every organisation**. We are committed to helping our clients harness the potential of AI to drive **innovation, efficiency, and competitive advantage**.

About Us

We are a boutique and exclusive Artificial Intelligence advisory and consulting firm.

Our team of preeminent consultants each have no less than 20 years' experience in Business, Technology, Strategy, and Growth.

Innovation

Integrity

Collaboration

Excellence

Our Services

- **AI Strategy & Roadmap Development**

Empower your business with a tailored AI strategy, roadmap creation, guidelines establishment, and policy formulation to ensure seamless and effective AI implementation.

- **AI Proof of Concepts and Testing**

Proof of Concepts (PoC) designed to help businesses trial and test AI solutions before full-scale implementation. With a focus on de-risking ROI, we ensure that initiatives are viable, effective, and aligned with your business objectives.

- **AI Advisory Services**

From strategic planning and board/executive presentations to fractional Chief AI Officer (CAIO) services and speaking appearances, we offer guidance to help you leverage AI for sustainable growth and innovation.

- **AI Implementation & Integration Projects**

Partner with us to manage the end-to-end deployment of AI solutions within your organisation. We'll ensure that AI projects remain aligned to your business objectives. Our collaborative and iterative approach lets you confidently adapt to change quickly.

- **AI-Enabled Products and Services**

Plan, design, and develop new AI-enabled products, services, and business models. Leveraging access to cutting-edge AI technologies and rapid prototyping methodologies, we provide end-to-end support to bring your innovative ideas to life.

- **AI QuickStart**

Deploy an AI Use Case in Just 5 Days. Our streamlined process accelerates insights by focussing on a single impactful use case. This may be top-line revenue growth, operational cost/effort reduction, or validating a new offering.

Our Proven Methodology

Your AI Voyage:

Our methodology is designed to guide businesses through the complex landscape of AI implementation and integration. Through a collaborative partnership that guides you from conceptual understanding to practical, impactful AI deployment.

Strategic Planning:

Utilising globally recognised techniques such as interviews, workshops, and observation to gather comprehensive requirements, we tailor an AI vision that aligns with your business objectives, market position, and long-term goals.

Prioritise For Impact:

With our methods, we categorise AI initiatives based on their importance to your business, ensuring focus on initiatives that bring the most value and align with your strategic objectives. Time, Cost, Risk, Return, Impact, and Value are all factored in.

Practical PoCs:

We use Agile concepts when developing and testing Proof of Concepts. This practical approach builds confidence in and demonstrates AI potential before full-scale implementation and costs.

Responsive PM:

Adopting Agile frameworks, we manage AI projects with a focus on adaptability and responsiveness, ensuring that they remain aligned with evolving business objectives. This flexibility allows for changes so AI initiatives remain relevant and on target.

Ethics, Security & Bias:

We embed ethical considerations, data security, and regulatory compliance into every stage. Regular bias audits, and secure AI practices ensure solutions are technologically advanced and ethically sound, secure, and compliant.

What other businesses are asking.

Finance	Clients	People	Internal	Operations	Innovation
What could AI do to/for revenue?	Could AI improve client satisfaction?	Can AI increase efficiency and/or productivity?	Can AI streamline internal processes?	Could AI shorten sales cycles?	Could we use AI to train staff?
What could AI do to/for COGS?	Could AI improve client attraction and/or retention?	Can AI improve accuracy and consistency?	Can AI automate some tasks?	Could AI reduce back-office effort?	Should we launch an AI assistant internally?
What could AI do to/for expenses?	Could AI scare clients away?	Can AI assist staff morale?	Can AI unlock new processes?	Could AI automate client delivery?	Should we bring a LLM in-house?
What could AI do to/for profit?	Could AI create new opportunities?	Could AI alienate some staff?	Could AI be a risk to existing processes?	Can AI be deployed safely?	Could we launch an AI-product/service?

What other businesses are already doing.

Why Choose Able AI?
